About Rajasthan Economic Association

The Rajasthan Economic Association (REA), registered under the Rajasthan Societies Registration Act of 1958, is one of the oldest and most distinguished academic bodies in the country, with a rich legacy shaped by many eminent economists. Dedicated to promoting the study, research, and dissemination of economic knowledge, the REA provides a vibrant platform for meaningful debates and discussions on both theoretical and applied economic issues. It consistently strives to address critical national and international economic challenges by organising conferences, seminars, workshops, and thematic academic events. In addition, the Association hosts lectures by renowned economists on key theoretical and policy-related topics. The REA also publishes the biannual Rajasthan Economic Journal which serves as an important forum for high-quality research and scholarly discourse in the discipline of economics.

Conference Concept Note

As India approaches its centenary of independence in 2047, the nation stands at a pivotal moment, having achieved notable progress in economic growth, technology, poverty reduction, and global integration, yet it requires deep structural reforms to realise its aspiration of becoming a developed, inclusive, and sustainable economy. India@2047 envisions a prosperous, competitive, resilient, and innovation-driven nation, and this conference seeks to examine the opportunities and challenges that will shape this journey by assessing current economic conditions, identifying drivers of long-term growth, analysing structural issues such as employment, inequality, productivity, infrastructure, and human development, and discussing the sectoral transformation needed across agriculture, manufacturing and services. It will also explore policy pathways for sustainable development, climate resilience, and energy transition while providing a collaborative platform for academicians, policymakers, industry leaders, and civil society to propose actionable strategies for India's long-term development.

India@2047: Historical Trajectory, Economic Transformation and Development Challenges
